

ST. FRANCIS MEDICAL CENTER RECEIVES AMERICAN COLLEGE OF RADIOLOGY ACCREDITATION

TRENTON, NJ - St. Francis Medical Center in Trenton, NJ has been awarded a three-year term of accreditation in Mammography as the result of a recent survey by the American College of Radiology (ACR). The ACR, headquartered in Reston, VA, awards accreditation to facilities for the achievement of high practice standards after a peer-review evaluation of the practice. Board-certified physicians and medical physicists who are experts in the field conduct evaluations. They assess the qualifications of the personnel and the adequacy of facility equipment. The surveyors report their findings to the ACR's Committee on Accreditation, which subsequently provides the practice with a comprehensive report. St. Francis Medical Center is equipped with the GE Healthcare Senographe Digital Mammography system complete with the Seno Advantage 2 Review Workstation®. This system, provides physicians with clear and precise all-digital images, rather than images on X-ray film. What's more, the system provides the largest field of view currently available, which can be extremely helpful for precision imaging of patients with diverse shapes and sizes. This workstation allows physicians to simply, quickly, and easily review patient's images, including information from multi-modality studies, at a single point of review. Physicians have the ability to pull up a patient's previous mammography exams for historical comparison or for comparison against other types of images, such as those acquired by ultrasound or MR, resulting in a more comprehensive view of a specific patient's medical history. The workstation also simplifies the sharing of information and images to referring physicians and surgeons. -more-
Page 2 - ACR Accreditation The ACR is a national organization serving more than 32,000 diagnostic and interventional radiologists, radiation oncologists, nuclear medicine and medical physicists with programs focusing on the practice of medical imaging and radiation oncology and the delivery of comprehensive health care services.
